GASTON ITAKA KITAMBALA

Gatineau, QC. | +1 (418) 933-0141 | gastonkitambala@gmail.com

SUMMARY

Full Stack Software Engineer with 3+ years of experience shipping and maintaining production web applications with React, TypeScript, Node.js, and REST APIs. Comfortable contributing across frontend and backend codebases, iterating on features with product and business teams, and debugging production issues through logs and monitoring. Uses AI-assisted development tools such as Claude daily for coding, debugging, and planning, while applying testing and code review to keep quality high. Strong communicator on remote teams and bilingual (English/French).

WORK EXPERIENCE

E'Mind Tek Thetford Mines, QC (Remote)

Software Developer (Full time) August 2022 – Present

- Shipped and maintained full-stack features in React, TypeScript, and Node.js, owning each one from design through production and post-release support.
- Built and integrated REST APIs with JWT authentication and role-based access control, connecting web and desktop clients to shared services.
- Collaborated with product, business stakeholders, and support to iterate on features based on user feedback and real-world usage.
- Wrote unit and integration tests, reviewed teammates' pull requests, and shipped through Docker-based CI/CD pipelines on AWS.
- Debugged production issues using application logs and monitoring, and used AI-assisted tools such as Claude daily for coding, debugging, and planning.

Transfer Multisort Elektronik Africa Kampala, Uganda

Embedded Software Engineer Intern Jan 2021 – March 2021

- Developed firmware drivers in C/C++ for AVR microcontroller-based systems and validated them through hardware integration testing.
- Implemented and debugged UART, I2C, and SPI communication, improving reliability between devices.
- Traced integration faults across firmware, drivers, and communication buses, breaking complex problems into small testable fixes.

EDUCATION

CÉGEP DE THETFORD Thetford Mines, QC

DEC - Computer Science Technology Aug 2021– May 2024

- Relevant Coursework: Web Development, Server Administration (Linux & Windows), Distributed Programming

KAMPALA INTERNATIONAL UNIVERSITY Kampala, Uganda

Bachelor of Science in Computer Engineering (Assessed by WES) Jan 2017– May 2021

- Cumulative GPA: 3.4/4.00
- Relevant Coursework: Embedded Systems, Software Engineering, Operating Systems, Algorithms, Networking

PROJECTS

- InspiraPic: AI image generator with a React front end and a Node.js/Express REST API over MongoDB, integrating a third-party image generation API.
- Bookstore app: full-stack CRUD application with REST endpoints, search, and a React UI (MongoDB, React.js, Express, Node.js).
- Portfolio (ReactJS)
- Modern Tic–Tac-Toe Game (ReactJS)

SKILLS

- **Programming Languages:** TypeScript, JavaScript, SQL, HTML5, CSS3, C#, Python, Java, PHP, C/C++
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Next.js, .NET, Spring Boot, Django
- **Web & API Development:** REST APIs, Third-Party API Integration, Authentication (JWT), Responsive Web Development
- **Databases:** Microsoft SQL Server, PostgreSQL, MongoDB (NoSQL)
- **Tools & Platforms:** AWS (EC2, S3), Docker, CI/CD Pipelines, Git, GitHub, Microsoft Azure, Kubernetes, Linux, Windows
- **Concepts & Practices:** AI-Assisted Development (Claude), Unit & Integration Testing, Logging & Production Debugging, Code Reviews, Remote Collaboration, Agile/Scrum
- **Spoken Languages:** French, English.
